Happy New Year! By now you have probably heard the exciting news that Socata has announced its new TBM 850. While the present TBM 700's offer outstanding performance Socata has made the ultimate flying machine even faster by having Pratt & Whitney develop the PT6A-66D for the TBM increasing the horse power to 850 enabling a maximum cruise speed at altitude of 315 to 320 KTAS. The time to climb to an altitude of 26,000 feet is a mere 15 minutes however at maximum cruise power there will be a slight reduction in range as the fuel quantity has remained unchanged at 281.6 useable gallons. If you would like to learn more about the TBM 850 please visit Socata's website at www.socataaircraft.com. The new price for a fully equipped TBM 850 will be in the \$2,800,000 to \$2,850,000 range. Contact your local TBM 700 dealer for further information, a demo flight, or to purchase an aircraft.
